Reference: Press Release No. 001/2025 - Expansion of Industrial Lamination Capacity

For immediate release

Dear Valued Customers,

Further to our announcement published in July 2024 regarding the expansion of our manufacturing facility, we are pleased to inform you of the commissioning

of a new state-of-the-art lamination production line that will enable us to double our installed capacity for barrier laminates, widely used by the pharmaceutical industry as primary packaging. This highly advanced, one-of-a-kind equipment in the country performs multiple processes simultaneously, significantly reducing production times and it will allow us to meet our customers' needs more efficiently, both in the domestic market and across the region.

Founded more than 27 years ago, our company reaffirms with this expansion its commitment to developing new products and services that meet the highest quality standards for the flexible and plastic packaging market.

The Board of Director
